License Number N124846W
Price € 15.500 fixed price | N\$ (~295.000) and US\$ (~16.600)
can change due to currency exchange rates

We are selling our beloved Land Rover Defender 110 Station Wagon 2005 with TD5 engine (~240,000km / 150,000 miles) as we have to move back to Europe. The car is a true gem, we will miss it very much as it has guided us safely through many adventures. Included are many extras such as the fridge (Snomaster 42l bought in December 2022), winch, built in air compressor, hi-lift jack, subwoofer, LED lighting (inside and out), rear view camera and dashcam and many more extras that we and the previous owner put in. Contact us so we can send you the full list of extras. These extras are of course included in the price. We want to sell the car at the end of February / beginning of March. Please be aware of the import fees if you want to register the car in countries like Kenya or Tanzania.

The car was imported from the UK by the Namibian Ambassador and is great for all kinds of adventures. It currently has the back seats out as we have installed a bed so we can sleep in the car. It turned out to work very well, which is why we recommend it to you should you be traveling alone or as a couple. We put mosquito nets around the bed and on the back windows, so you are protected from them in the car and you can still open the windows if it gets too warm. I am 1.94 meters tall and still fit in well and slept peacefully! Other than that, the device to put in the back row of seats is still there. The rear seats are currently located in Windhoek, Namibia. It is not a big deal at all to change the seats.

It is original Landrover green with partial aluminium checker plate decking. All back windows are mirrored. Both panorama roof windows were replaced with aluminium plates. The consumption is very low for a permanent 4x4 with around 10l/100km - way less than Toyota LC etc.

If you are interested you can contact us at +264817891375 on Whatsapp, preferably in English, German or French.
